

► NAP GLADU Gives You an E.D.G.E

At NAP GLADU our mission of *Delivering Productivity* begins with providing state-of-the-art cutting tool solutions that maximize the production capabilities of to your facility. Through our unmatched technical expertise and intensive customer support, we pride ourselves on helping your company grow while reducing costs.

The Cutting E.D.G.E Program brings our partnership to the next level. A trained staff of NAP GLADU Tooling Specialists will travel to your location and through our comprehensive E.D.G.E. process we will work closely with you to enhance every aspect of your production process.

The Cutting E.D.G.E Program includes:

- **Evaluating** current machine set-ups, cutting processes, and cutting tools.
- **Diagnosing** any issues that could impact tool performance such as machine issues, tool handling and proper cutting parameters.
- **Goals** developed to ensure maximum tool performance.
- **Educating** employees on proper tool handling, safety, cutting tool set-up and troubleshooting.

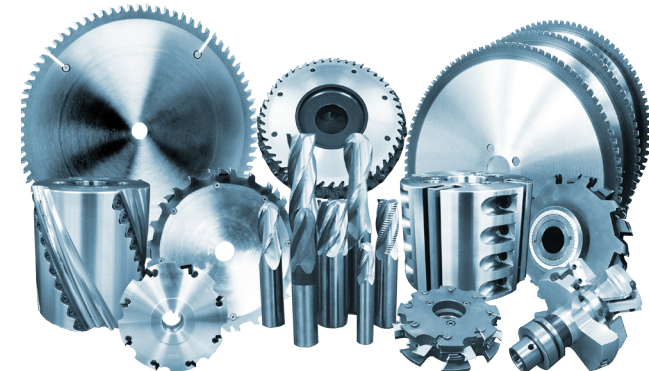

► Program Overview

- NAP GLADU will travel to customer location with up to three Tooling Specialists (number of tooling specialists depends upon size of facility).
- NAP GLADU will hold up to (3) Education seminars during the visit. (1 seminar per shift).
- A classroom environment is required to conduct the educational portion of the E.D.G.E Program.
- Tooling Specialists will conduct evaluations, perform diagnostics, develop goals and provide training hand-in-hand with a customer rep.
- Proper Safety Procedures will be followed to ensure the safety of all participants, including all employees and NAP GLADU Tooling Specialists.
